

## **JDC MotorSports Concludes Successful Test at Sebring**

**January 10, 2006 Lakeville, MN**, - - JDC MotorSports recently concluded a very successful test with current FC National Champion Niki Coello behind the wheel of a JDC Star Mazda race car. The test was the first opportunity for Coello to sample the Star Mazda car and the Sebring racetrack.

“Niki did a great job adapting to the Star Mazda car while also learning the Sebring track. By the end of the first day he was running very competitive times without any tweaking of the car,” said team co-owner, John Church. “Niki definitely has the ability to run up front in the Star Mazda Championship, hopefully we can put a program together with him.”

“Working with the JDC MotorSports team was a great experience,” said Coello. “The car setup was very neutral which made it very easy to go fast. I can’t wait until my next opportunity to run with them.”

JDC MotorSports completed 400 trouble-free miles of running at Sebring and looks forward to the next test in late January. The team has recently expanded its Star Mazda program to 3 cars for 2006 and currently has seats available for the entire Star Mazda North American Championship as well as winter testing.

The team will continue testing in late January, February and March, with multi-day tests scheduled each month. For additional information on remaining seats for the 2006 season, please contact John Church at (952) 233-3075 or email [jdcmtsrprt@aol.com](mailto:jdcmtsrprt@aol.com).
