

March 20, 2008

Kester Racing & Texas World Speedway form alliance.

Kester Racing is proud to announce that it has formed a partnership with Texas World Speedway ("TWS") (www.texasworldspeedway.com) in College Station, Texas; which as recently come under NEW OWNERSHIP. Even though TWS is a great facility with a rich history, the new ownership immediately implemented a plan to raise the professionalism and facility improvements of TWS.

TWS will be supporting Kester Racing's preparation for the Star Mazda Championship series while Kester Racing will be exposing TWS at all the Star Mazda Championship races as well as other local and national events. Already, J.C. and Kristy made an appearance, with one of their Star Mazda cars, at a local fundraiser for the Candlelighters Child Hood Cancer Foundation which is supported by TWS.

Additionally, this partnership with TWS allows Kester Racing arranged discounts to all 2008 Star Mazda teams for testing at TWS.

In a recent release, J.C. stated that "Texas World Speedway is a historical track with a lot of great features; we are truly lucky to be a part of its expanding operation and will definitely benefit from the countless hours of testing."

About Texas World Speedway:

Texas World Speedway was built in 1969 and is one of only seven Super Speedways of two miles or greater in the U.S and is the only Super Speedway in the Southwest. In addition to the two mile high 22 degree banked oval, TWS is designed for the road racer with a 1.5 mile oval, a 1.8 mile road course, a 1.9 mile high speed road course and a 2.9 mile course. All of these tracks use the

same straightaway in front of the grandstands and can be ran counter or clockwise.

TWS has a rich history, including being known as "The World's Fastest Speedway"; when Mario Andretti set a world closed course speed record of 214.158 mph on October 6, 1973 while qualifying for an Indy car race. That record stood in the Guinness Book of World Records for twelve years. Also, A. J. Foyt has won more races at TWS than any other driver. He is the only race car driver to have won races in both an Indy Car and a Stock Car, and the only driver to have won races in both types of cars on the same day.

TWS is very accessible with its own highway frontage. TWS is centrally located in Texas in the City of College Station which is within the Dallas-Houston-San Antonio triangle. From these cities, TWS can be accessed by state or US interstate highways. Additionally, Texas A&M University's Easterwood Airport has daily commercial airline flights.

TWS – private, multi-layout, centrally located, year round, infield garages, low friction, and professional facility for Star Mazda teams.
