

**Michael Guasch Exits Utah With Master Series Points Lead**  
*Molecule Sponsored Driver Adam Christodoulou Takes Overall Victory*May 22, 2009  
Tooele, Utah

Molecule sponsored drivers Michael Guasch and Adam Christodoulou wrapped up another successful weekend of Star Mazda competition, with Christodoulou capturing the overall victory, as both wrap up the weekend as the points leaders in their respective championships following Round Three of the Star Mazda Championship presented by Goodyear at Miller Motorsports Park, just outside of Salt Lake City.

"It definitely wasn't an easy race," said Christodoulou, the 2008 U.K. Formula Renault Champion. "Alex was pretty quick, got a decent re-start and he actually pulled away at the start while I was battling it out with the guys behind me. I caught back up with him and pushed him as hard as I could into the first corner and I think he hit the kill switch, and that was it for him. Obviously I passed him, took the lead and just kept my head down and took it to the end. Special thanks go out to everyone at JDC Motorsports for their hard work this weekend and to Michael Guasch and Molecule Labs for their sponsorship of my efforts."

While Christodoulou was battling it out for the race victory at the top of the thirty-three car field, Guasch, from Walnut Creek, California, was fighting to reel in fellow Master Class and MOLECULE Formula Mazda Challenge competitor, and the 2008 Master Class Champion, Chuck Hulse.

"Chuck and I have been racing each other in West Coast events for several years and it was fun having him back at the track for this event," Guasch explained. "Chuck had the early edge in the race but I was gaining on him in the closing laps and just ran out of time. I was hoping to be back up on the podium gain after Sebring and Virginia but Chuck drove a great race. I also have to offer up congratulations to Adam for another superb drive and thanks to my mechanic Rafael and everyone else at JDC Motorsports for the long hours they put in to making our cars go fast."

With his second victory of the season Christodoulou takes a five point lead over Peter Dempsey at the top of the championship while Guasch stretches his Master Class points lead to ten points over his JDC Motorsports teammate Gerry Kraut.

The Molecule Racing drivers now look to the upcoming double race weekend at New Jersey Motorsports Park in Millville, New Jersey, for Rounds Four and Five of the Star Mazda Championship presented by Goodyear on June 12-14.

**About JDC Motorsports**

Involved in formula car racing since its inception in 1994, JDC Motorsports has established itself as one of the leading junior open-wheel teams in North America. Initially making its mark in the F2000 class of club racing competition, JDC Motorsports was soon a team worth watching in the pro ranks. Competing in the Formula Ford 2000 Zetec Championship, the team not only won races, but also helped develop multiple young drivers. In 2005, JDC Motorsports expanded its efforts, entering the Star Mazda Championship. Quickly becoming one of the top teams in the series, JDC captured both driver and team titles last season, as well as Rookie of the Year honors with Dane Cameron scoring a series-high three wins. This past season, JDC Motorsports finished fourth in its inaugural season F2000 Championship Series competition and as the runner-up in the Star Mazda Championship.

**About Molecule Labs**

Molecule Labs has its roots in both specialty chemical manufacturing and motor sports. Over the years, its creator, Michael Guasch, has often worn a lab coat one day and a racing suit the next. His unique understanding of these two distinct professions brought Molecule™ Technical Fabric Care System into being. Guasch's expertise developing innovative protective chemicals led to the sale of one of his national brands to a Fortune 500 company in 2005. But instead of retiring, he decided to devote more time to racing.

With his increased time on the racetrack, Guasch realized that his Nomex® racing suits required special care that dry cleaning and ordinary laundry products could not provide. So he returned to the lab to develop a new line of protective chemicals and care products specifically formulated for Nomex® and other technical fabrics.

After two years of development and testing, in the lab and on the track, Guasch and his new company have created the four-step Molecule™ Technical Fabric Care System.
