Molecule Labs Extends Sponsorship with Adam Christodoulou for Remainder of Season *Upcoming Nineteen Year Old British Rising Star Joins Molecule Racing Stable*

June 2, 2009
Benicia, CA

On the heels of a successful one race sponsorship deal with Adam Christodoulou at Miller Motorsports Park, which saw Christodoulou capture his second victory of the season, Molecule Labs president, and JDC Motorsports teammate, Michael Guasch has announced today that they will extend their partnership with the Star Mazda Championship points leader for the remainder of the 2009 Star Mazda Championship presented by Goodyear.

“Working with Adam as a teammate and fellow series competitor this year I have been very impressed with the work ethic, dedication and talent of this young driver,” Guasch explained. “He is the real deal and I am proud that Molecule Labs will be his first sponsor from the United States as he races towards the championship.”

Starting at the Round Four and Round Five double header weekend at New Jersey Motorsport Park on June 12 -14th Christodoulou’s #11 JDC Motorsports Pro Formula Mazda will sport a similar car design to Guasch who is currently leading the Master Class in the # 91 Molecule Labs / JDC Motorsports entry.

“I am obviously happy that Molecule is coming onboard with my program, Mike is a great teammate and Molecule is an awesome product”, said Christodoulou, the 2008 U.K. Formula Renault Champion. “It is so hard these days to find companies which are willing to support young drivers and I am looking forward to working with Molecule and Mike to help building the Molecule brand here in the US as well back home in Europe.”

Beyond the support of talent there is also a business aspect to the decision in expanding the Molecule sponsorship to a two car entry.

“In addition to the North American market Molecule is currently growing rapidly and expending more and more into Europe. In the United Kingdom, our distributor David Charles Group works with several Formula One teams and additional retail partners such as Demon Tweaks Direct and GrandPrix Racewear for example.” Guasch explained. “Though Adam is racing here in the United States his racing background is in Europe and the UK, where he has a substantial following, so it makes perfect sense for us to work with him, utilizing our programs for our European distributors as well.”

The Molecule Racing drivers now look to the upcoming double race weekend at New Jersey Motorsports Park in Millville, New Jersey, for Rounds Four and Five of the Star Mazda Championship presented by Goodyear on June 12-14.

About JDC Motorsports

Involved in formula car racing since its inception in 1994, JDC Motorsports has established itself as one of the leading junior open-wheel teams in North America. Initially making its mark in the F2000 class of club racing competition, JDC Motorsports was soon a team worth watching in the pro ranks. Competing in the Formula Ford 2000 Zetec Championship, the team not only won races, but also helped develop multiple young drivers. In 2005, JDC Motorsports expanded its efforts, entering the Star Mazda Championship. Quickly becoming one of the top teams in the series, JDC captured both driver and team titles last season, as well as Rookie of the Year honors with Dane Cameron scoring a series-high three wins. This past season, JDC Motorsports finished fourth in its inaugural season F2000 Championship Series competition and as the runner-up in the Star Mazda Championship.

About Molecule Labs

Molecule Labs has its roots in both specialty chemical manufacturing and motor sports. Over the years, its creator, Michael Guasch, has often worn a lab coat one day and a racing suit the next. His unique understanding of these two distinct professions brought Molecule™ Technical Fabric Care System into being. Guasch's expertise developing innovative protective chemicals led to the sale of one of his national brands to a Fortune 500 company in 2005. But instead of retiring, he decided to devote more time to racing.

With his increased time on the racetrack, Guasch realized that his Nomex® racing suits required special care that dry cleaning and ordinary laundry products could not provide. So he returned to the lab to develop a new line of protective chemicals and care products specifically formulated for Nomex® and other technical fabrics.

After two years of development and testing, in the lab and on the track, Guasch and his new company have created the four-step Molecule™ Technical Fabric Care System.
